W.P. 90-42-29

Dear Mr Gundappa Gowda,

Every year the Health Department used to give me intimation of the prevalence of Typhoid cases and I used to thank them for it and get my children inoculated. This year, I am sorry to say, the usual courtesy was somehow lost sight of by the Department and I myself was not aware of the danger. Unfortunately, one of my daughters - who was an Angel in the family - got an attack of Typhoid fever, and in spite of the best medical aid she passed away on the 29th of last month in the Victoria Hospital.

There is constant stagnation of sewage, owing to faulty construction of drains, which meet in front of my house. It naturally fouls the atmosphere and I have been complaining of it from nearly ten years. One of the drains was diverted by the municipality, and about a year ago the Director of Public Health was good enough to cause a partial diversion of another drain. But the nuisance has not stopped and there is an honest doubt whether it could not have contributed to the spread of the infection. I will be much obliged if you will kindly press the combined attention of the municipality and the Health Department to this avoidable nuisance and give me complete relief.

SECY LAW DEPT MYSORE

If the pipe connection is anywhere in close proximity with the underground drainage, that also may kindly be instructed to be suitably rectified so that the water supply may be free from possible infection.

Thanking you in advance,

Yours sincerely,

P Mahadevayya

LAW DEPARTMENT BANGALORE

SIR

With reference to your letter No L 5485 dated 1-12-1942 forwarding for report a copy of letter dated 13-11-1942 from Rajadharma Pravina Dewan Bahadur P Mahadeviah, Retired Chief Justice in Mysore, Bangalore, regarding the prevalence of - Typhoid fever in the locality wherein he resides, I have the honour to state that on intimation of the existence of Typhoid, the following precautionary measures were taken to combat the epidemic immediately it was noticed

2 Special hand bills were got printed in different languages and widely distributed in the City requesting the public to get themselves protected One L M P was specially appointed for doing anti-typhoid inoculation for a period of 2 months from - 16-9-1942 and 4 additional L M P's were also entertained for a period of 2 months, two from 28-9-1942 and 2 from 2-10-1942 Inoculation drives were also arranged to inoculate people from house to house The number of inoculations performed during the months of September, October and November 1942 are noted in the margin

	Plague	Cholera	Thphoid
September '42	842	6548	407
October '42	1228	6531	217
November '42	575	530	190

3 Other elaborate preventive measures were also taken side by side such as disinfective fruits and vegetables with Chlorine solution in Market and places where they were sold, preventing

the sale of food articles on drains footpaths and systematic inspection of hotels

4 Some of the hotels in Chamarajapet were persuaded to be closed as a preventive measure

5 As regards the defect in the system of drainage referred to by Mr P Mahadevayya, it is stated that an underground - pipe line and the box drain have been located side by side near the corner of the house Four gully traps have already been fitted up to the storm water drains situated behind and to the side of the house, connecting sullage water to the underground pipe line This underground pipe line is now reported to be clean The box drain and the storm water drain, are also - kept clean

6 A copy of the report No E1 4157 dated 5-12-1942 of the Health Officer, detailing to the action taken in this behalf is herein enclosed for favour of the information of Government

I have the honour to be
Sir,
Your most obedient servant,

Municipal Commissioner

ksm

Report No G1 4157 dated 5-12-1942 from the Health - Officer, City Municipality, Bangalore, to the Municipal Commissioner, Bangalore City Municipality, Bangalore

---

With reference to your memo No C2-C 818/42 dated 2-12-1942 regarding the prevalence of typhoid fever in - Chamarajpet area etc , I have the honour to place before you the following facts for favour of your kind information

1 During times of epidemics special hand bills are generally got printed in different languages and widely distributed in the City requesting the public to get themselves protected In addition to this, special inoculation depots are opened in different parts of the City and inoculation drives are also arranged to inoculate people from house to house Other elaborate preventive measures are taken side by side such as disinfecting fruits and vegetables with chlorine solution in market and places where they are sold, preventing the sale of food articles on drains, foot-paths and systematic inspection of hotels etc

The hand bills printed and distributed in three different languages during the recent epidemic of Cholaric Diarrhoea are herewith enclosed for kind information During such - occasions the public come forward in several batches to get themselves protected and several requisitions would be received from different sources for inoculation which would all be attended to promptly

2 In the year 1939 there was epidemic of typhoid in the City when such notices were got printed and widely distributed by the then Health Officer (vide printed copies enclosed for ready reference) several hundreds of anti-typhoid inoculations were done then in the several depots including inoculation - drives

3 In the present instance it is seen that the child died of typhoid in the Victoria Hospital on 29-10-1942 On enquiry I was given to understand that the child died of haemorrhage during second infection of typhoid after first recovery - Probably the child might have developed fever about a month back that is about 29th September 1942, and allowing a margin of 11 days for incumbation period, the child would have got the infection somewhere about 18th of September 1942

4 It is seen from the records that during the month of September 1942, no case of typhoid had been reported from the whole of Chamarajpet, the only five sporadic cases that had occurred in the division was from January to August 1942 for which many persons had already been inoculated in the infected blocks

5 I had inspected the drain on 3-9-1942 an underground - pipe line and the box drain have been located side by side near the corner of the house Four gully traps have already been fitted up to the storm water drains situated behind and to the side of the house-connecting the sullage water to the under ground pipe line which was found to be clean on the day of - inspection The box drain and the sotrm water drain requires some repairs and a reference has this day been made to the Municipal Engineer for needful All connected papers are - herewith enclosed

'Copy"

KSM

MUNICIPAL COMMISSIONER

OFFICE OF THE MUNICIPAL COMMISSIONER
BANGALORE CITY DATED 24TH SEPTEMBER 1942

NOTICE

For the last four weeks cases of loose motions and vomiting among people were being reported from Santhusapet in III Division Basettypet and Ranga swamy Temple Street in II Division and recently similar cases have occurred in Chamarajpet and Goripalya So far 25 people have suffered and 16 cases have proved fatal On examination the cause seems to be due to organisms which are similar to cholera In view of the fact that there has been some infection in bordering villages of Kolar Chitaldrug and Shimoga Districts and the probability of importation of infection on a large scale into this City on account of its importance and traffic convenience it is desirable that the public do take all precautionery measures necessary to prevent the spread of the disease in an epidemic form

The Health Department will spare no pains to give protective facilities to the public

It can be prevented by observing the following rules —

1 Articles of food water and milk should be kept well covered over to prevent flies and dust settling upon them

2 Well boiled water and fresh hot food should be taken

3 To avoid taking sweets cut fruits and other eatables exposed for sale in the streets as they are contaminated by flies and dust

4 To avoid taking strong purgatives when the disease is prevailing

5 To keep your house and its premises thoroughly clean by getting rid of all dirt and dung from the premises

6. To report all cases of diarrhoea and vomiting to the authorities of the Health Department with the least delay and to follow the instructions that may be given by them

7 To avoid taking raw and uncooked vegetables unripe and overripe fruits and stale food

8 To get such suspected patient removed to the Isolation Hospital for treatment

9 To get inoculated against cholera which will afford protection

For the convenience of the public the following centres of inoculation will be opened —

1 Victoria Hospital Laboratory
2 Chamarajpet Dispensary
3 Ganigarpet Dispensary
4 Balepet Dispensary
5 Aralepet Dispensary
6 Mavalli Dispensary
7 Basavangudi Dispensary
8 Municipal Office
9 The City Health authorities will undertake to do mass inoculations if the public can assemble in large numbers at important centres in the City and Extensions.
10. Private medical practitioners have been requested to do inoculations and they will be supplied vaccine from the Health Office.

A A. KHAN,
Municipal Commissioner.

اشتہار مورخہ ۲۴ ستمبر ۱۹۴۲ء

گزشتہ چھ ہفتوں سے یہ اطلاعات مل رہی ہیں کہ تیسری ڈویژن میں سوتش پیٹ میں دوسری ڈویژن میں لشٹی ایا اور رنگ سوامی ٹمپل سٹریٹ میں اور ابھی حال ہی رورکے آگے جامرال پیٹ اور گوری مالیہ میں لوگوں کو قے اور خلاب ہونے لگے اب تک ۲۵ اوادا اس مرض میں مبتلا ہوئے جن میں ۱۶ ہلاک ہوگئے معائنہ کرنے کے بعد ثابت ہوا کہ یہ مرض بھی اُن کیڑوں کے ذریعہ پیدا ہوجاتا ہے جو ہیضہ کے کیڑوں کے مساوی رہا کرتے ہیں چونکہ کولار چیلرگ اور سیمو گہ کے شہتیری قریہ جات میں اس قسم کا مرض پھیلا ہوا ہے اور ان مقامات سے آمدورفت کے ذریعہ شہر بنگلور میں بھی اس مرض کے پھیل جانے کا احتمال ہے اس لئے نہایت ہی اشد ضرورت اس امر کی ہے کہ ماسعد گان بنگلور سٹی اس مرض کے پھیلاؤ کو روکنے اور اُس کو متعدی صورت میں نمودار نہ ہونے کے لئے ضروری احتیاطی تدابیر اختیار کریں

یہ مرض کہ اس مرض سے محفوظ رکھنے کے لئے میلتھ ڈپارٹمنٹ (محکمہ حفظانِ صحت) کی طرف سے ہر طرح کی امداد دی جائے گی۔ حسب ذیل تدابیر اور ہدایات عمل کرنے سے اس مرض کا پھیلاؤ روکا جاسکتا ہے۔

۱۔ عدا ، مانی ، اور دودھ کو اچھی طرح ڈھانپ کر رکھیں تاکہ ان پر مکھیاں بیٹھنے نہ پائیں اور گرد و غبار نہ جمے۔

۲۔ خوب جوش دیا ہوا پانی پئیں اور تازہ گرم غذا کھائیں۔

۳۔ کھیل اور دستور کے مطابق طور پر رواج کئے جانے والی مٹھائیاں کٹے ہوئے پھل اور کھانے کی چیزوں کو کھانے سے پرہیز کریں کیوں کہ اس قسم کی چیزیں مکھیاں اور گرد و غبار کی وجہ سے بگڑ جاتی ہیں اور استعمال کے قابل نہیں ہوتیں

۴۔ اس مرض کے پھیلاؤ کے ایام میں رودار مسہل (خلاب) نہ لیں۔

۵۔ اپنے گھر اور اُس کے اطراف کی رہیں کو ہمیشہ صاف رکھیں ہر قسم کے کوڑے کرکٹ اور غلاظت کو نکلوا دیں۔

۶۔ اگر کسی شخص کو بدہضمی سے ہونے والے خلاب یا قے شروع ہو جائیں تو فوراً ہیلتھ آفیسر کو مطلع کریں اور محکمہ حفظانِ صحت کی طرف سے جو ہدایات دیئے جائیں اُن پر بالصرور عمل کریں۔

۷۔ کچی اور نہیں پکی ہوئی ترکاریوں کچے اور نہ ہی پکے ہوئے پھلوں کے کھانے سے پرہیز کریں۔

۸۔ اگر یہ گمان ہو کہ کوئی شخص اس قسم کے مرض میں مبتلا ہو چکا ہے تو ایسے مریض کو بغرض علاج آئی سولیشن ہسپتال کو بھیجنے میں مدد کریں۔

۹۔ کالرا (ہیضہ) کا ٹیکہ ڈلوالیں تاکہ اس مرض کے حملے سے محفوظ رہ سکو۔

یہ ٹیکہ کی سہولت کے لئے مندرجہ ذیل مرکزوں میں اناکولیشن (ٹیکہ) ڈلوانے کے انتظامات کئے جائیں گے۔

۱۔ وکٹوریہ ہسپتال لیبارٹری۔

۲۔ جامراج سب کی ڈسپنسری۔

۳۔ تملی پیٹ کی ڈسپنسری۔

۴۔ سنگڑی پیٹ کی ڈسپنسری۔

۵۔ روئی پیٹ کی ڈسپنسری۔

۶۔ ناگھلی کی ڈسپنسری۔

۷۔ نسوں گڑی کی ڈسپنسری۔

۸۔ میونسپل آفس بنگلور سٹی

۹۔ اگر سٹی اور کنٹونمنٹ کے مرکزی حصوں میں لوگ زیادہ تعداد میں جمع ہوں تو سٹی ہیلتھ ڈپارٹمنٹ کے ذمہ دار افسر اناکولیشن ڈلوانے کا انتظام کریں گے

۱۰۔ مرائیوٹ طور پر مطب کرنے والوں کو ہیلتھ آفیسر کی طرف سے اناکولیشن ڈالنے کے لئے دوائی فراہم کی جائے گی۔ تاکہ وہ خواہش مندوں کو اناکولیشن ڈالدیا کریں۔
